OCIO.ORG: The "Toolkit" Workbook

cio.org is dedicated to advancing Outsourced Chief Investment Officer services through education, advocacy and insight. We offer this collection of presentations or "toolkits" on key topics as a resource for institutional investment committees, business leaders and industry professionals interested in the OCIO business model and best practices.

STATUS QUO OR OCIO?

	F	Agre	е		Disag	gree
The investment committee understands its fiduciary responsibilities and has time to educate itself on evolving standards specific to the organization's investment purpose (e.g., pension, endowment, foundation, healthcare).	N/A	1	2	3	4	5
The roles of investment committee members and other internal staff are clearly defined. Investment committee meetings are well organized and attended.	N/A				4	
The investment committee spends most of its time on high-level strategic objectives (risk tolerance and long-term investment goals) and little to no time on the day-to-day management of the portfolio.	N/A	1	2	3	4	5

The investment committee is comfortable and effective in communicating its investment approach and the status of the portfolio to key constituents (e.g., Board of Directors, senior management, outside donors).

ocio.org workbook 2

N/A 1

		4				
Portfolio Construction		Agre	ee	Disagree		
The investment committee/organization has sufficient time and expertise to evaluate a wide range of managers and vehicles.	N/A	1	2	3	4	5
If the investment committee receives assistance from third-party advisers (e.g., consultants):						
The investment committee is capable of translating advice received from one or more advisers into a comprehensive portfolio.	N/A				4	
Those advisers have an "open architecture" approach to the selection of managers/vehicles (and do not have financial incentives to recommend specific managers/vehicles to the investment committee).	N/A	1	2	3	4	5
The investment committee wants to make all investment decisions for the portfolio.	N/A				4	
There is a centralized and disciplined process for making investment decisions.	N/A	1	2	3	4	5
Implementation		4				
		Agr	ee		Disa	gree
The investment committee has delegated the day-to-day implementation of investment decisions (hiring, firing and monitoring managers/vehicles) either to internal staff or to third parties.	N/A	1	2	3	4	5
If not, the investment committee has sufficient expertise (either directly or with the help of internal staff or third parties) to hire, monitor and fire managers and other parties (e.g., broker, custodians).	N/A				4	
If appropriate, the investment committee has access to alternative investments (e.g., private equity, hedge funds) for the portfolio.	N/A	1	2	3	4	5

The investment committee has the ability (either directly or with the help of internal staff or third parties) to:

Disagree Agree

Review, negotiate and execute the legal documentation required for portfolio investments.

Disagree Agree

The organization has been pleased with the performance of the investment portfolio over most periods.

N/A 1

Back Office

Disagree Agree

N/A 1

The investment committee receives full portfolio and performance reporting including data aggregation and attribution analysis.

N/A 1

The investment committee has support dealing with custodian and prime brokers.

Talent

If the investment committee relies on an internal CIO/investment office:

The investment office can attract/afford to hire top talent.

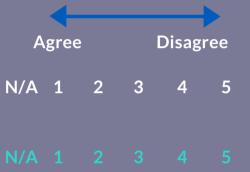

There is a deep pool of investment office staff to cushion unexpected departures or to manage succession.

Cost

The overall resources available to the investment committee are adequate and within the organization's budget.

The cost of OCIO would be significantly higher than the cost of obtaining similar resources through various internal and external providers.

NOTES	
	$\frac{\lambda}{\mu} = 0$

OCIO IMPLEMENTATION SYSTEMS

- "One -size-fits-all"; no/low customization approach
- OCIO invests the client's assets in a single commingled vehicle with a fixed asset allocation
- All clients with the same risk profile invest in the same fund
- Better for smaller investors: economies of scale for administrative costs and negotiation strength
- Limited to specific strategies
- Investments not portable

HYBRID

- More asset allocation flexibility
- OCIO offers one or more commingled vehicles with the ability to vary asset allocation through the use of different underlying "series" or "sleeves"
- Investments have limited portability

COMBINATION

Choose different systems by asset class (e.g., single portfolio for alternatives. fully customized for traditional)

FULLY CUSTOMIZED

- Closest to in-house CIO: maximum discretion/flexibility within investment guidelines for asset allocation and manager selection
- Portable: client invests directly with external managers/owns underlying investments (rather than a share of pooled vehicles)
- Greatest transparency
- Not practical for smaller investors: higher accounting, custody, operational costs.

NOTES

LEGACY ASSETS

MARKETABLE

- Communicate organization's preferences, if any, on retaining particular investments.
- Will the OCIO sell all existing investments, or will it carefully consider whether any fit its strategy requirements?
- For assets that will be sold. how will the OCIO minimize transaction costs and avoid "fire sale" losses?

ILLIQUID

- Fund-of-Funds continued reporting
- Hedge Funds ongoing manager due diligence, secondary sales opportunities, timed redemption
- Private Equity/Real Estate ongoing manager due diligence, secondary sales opportunities, capital calls, distributions, voting, side letter compliance, blocker elections

FEES

- No Fee? Don't expect much.
- **Discounted Fee** Assets managed at a discount to OCIO's percentage of AUM rate.
- Full Charge OCIO includes legacy assets in overall AUM fee calculation.
- Fund-of-Funds Fee In the case of illiquid fund-of-fund investments, the OCIO charges a flat fee per fund.

	NOT	ES	
		2	

OCIO FEE TEMPLATE

This template helps give a more nuanced view of how a bidding OCIO intends to slice and dice the plan sponsor's assets, and the costs involved.

Α	В			E	F					K		M
		ide Asset ation(%)	OCIO Fee	Fund of Fund Fees	Admin. Expenses of Fund of Funds	**Underlying Manager Fees (SMA and Fund)	Fees Plus Fund of Funds Admin. Expenses at Current Allocation	Fees Plus Fund of Funds Admin. Expenses at Proposed Allocation	% Actively Managed Proposed	%Passively Managed Proposed	Disclosure of Affiliated Broker, Custodian,Fund Administator, or other services fees provided by bidder	% Proprietary Assumed Used for Proposed
	Current	Proposed									Y/N	
Asset Class*											Yes, we earn additional fees from Or	
	0.0%+	0.0%	0.0%	0.0%	0.0%	0.0%	0.0%	0.0%	0.0%	0.0%	None.	0.0%
Total	0.0%	0.0%	0.0%	0.0%	<u>0.0%</u>	<u>0.0%</u>	0.0%	0.0%	0.0%	0.0%	0.0%	<u>0.0%</u>

Column A: Add a row for your current allocation to each asset class (e.g., US Equities-Large Cap; US-Equities-Small Cap; Developed Market Equities; Emerging Market Equities; Frontier Market Equities; Fixed Income; Hedge Funds; Real Estate; Private Equities; Commodities). If you are not currently using an OCIO provider, ask the bidding OCIO enter its proposed asset

Column B: Enter your current allocation, or zero if not currently using an OCIO provider,

Column C: Bidding OCIO to enter its proposed allocations for each asset class.

Column D: Some OCIOs charge a flat fee for different asset classes and different implementations of exposure (active or passive). Bidding OCIO to enter fees.

Columns E, F & G: Bidding OCIO to input the total fees (if applicable) for fund of fund products, administration expenses and underlying manager fees.

Columns H & I: Bidding OCIO to input H. Shows the total fees payable by an asset owner for the proposed implementation of exposure - as a percentage of the plan's assets - to the respective asset classes.. If you are bidding out an existing OCIO mandate, complete I to compare the fees payable under your existing agreement.

Columns J & K: Bidding OCIO to enter its proposed allocation to active and passive management.

Column L: Bidding OCIO to complete. This column assumes conflicted fee arrangements that are not OCIO. A bidder that answers "yes" is not a true OCIO.

Column M: Bidding OCIO to enter the amount of proprietary product that they propose to use in implementing their plan, how much is active vs passive (if you see 50bps in column D for a 100% passive exposure, you should be asking why) and whether the bidding firm receives additional fees from other departments within the organization.

OCIO PERFORMANCE REPORTING

present actual returns . . .

Hypothetical or backtested returns should be offered only in addition to actual returns and should be clearly marked.

for all clients

All clients should be included in at least one appropriate composite to avoid cherry-picking concerns.

that are net of all fees . . .

Including all investment manager fees, fund-of-fund fees, as well as custody, administrative and legal expenses.

and include both total return and specific asset class composites . . .

To show the value added/detracted by portfolio-level decisions and assess the risk levels behind the returns.

compared against appropriate benchmarks . . .

Benchmarks should be widely accepted industry standards and comparable to composite characteristics.

while <u>excluding non-discretionary</u> accounts and <u>legacy</u> investments.

That do not reflect the OCIO's performance.

Encourage GIPS®

A small, but growing number of OCIOs already adhere to the CFA Institute **Global Investment Performance** Standards ("GIPS"). GIPS reduces misleading practices and helps level the performance playing field.

NOTES	

BEFORE THE OCIO SEARCH: **HIT PAUSE**

OCIO or bust? Decide whether to limit the search to true OCIO (with fiduciary responsibility, discretion/accountability and independence) or include other outsourced providers that don't offer the same benefits and may have conflicts of interest.

Investment philosophy. Make sure the investment committee is clear on its investment philosophy. An OCIO match in investment philosophy is critical.

Check the "whether." Convene a meeting of key stakeholders and discuss:

• whether there are any anticipated directional changes or adjustments to the organization that could affect enterprise risk or the investment portfolio;

• whether there is interest in values-based investing (e.g., DEI, ESG), if appropriate.

"Most Wanted" list. Which OCIO features or services are most important to the organization? Create a list of three to five "must have" features such as:

- governance and fiduciary support
- experience with similar clients
- alternative investment capabilities
- open architecture manager selection (a "built-in" feature of true OCIO)
- service ethic, firm size/number of clients

Identify any issues. How well is the portfolio achieving its purpose and what needs improvement? Ask if internal teams (e.g., accounting) need additional support.

Control. Determine how much control the investment committee is comfortable delegating. Be reasonable: if the investment committee won't delegate the "meat" of decision-making, it may need to "order chicken" instead.

NOTES	

HIRING AN OCIO SEARCH CONSULTANT

Ask the question:

Does the investment committee have the time and expertise to identify the best OCIO providers in the marketplace, conduct extensive due diligence to determine which one is best for the organization. and then negotiate the terms of the arrangement?

If the answer is "no," consider hiring a search consultant.

Independent. Check to see whether the search consultant has any ties to outsourcing providers or other financial services firms.

Experienced. Explore the history of the firm and check the credentials of the professionals that will be working with you.

Successful. Call references. It's not enough for a consultant just to close a search. Ask how long the referring organization has been partnered with its OCIO and if the "marriage" is a happy one.

What to ask the candidates:

- Provide a brief history of your firm. When was it founded and by whom?
- What is the current ownership structure of the firm?
- Provide biographies of the professionals that will be assigned to our search if we hire you.
- Are OCIO searches your only or main business?
- Do you also provide OCIO or any other type of financial services?
- Do you have any affiliations or financial arrangements with any OCIO providers or other financial services firms?
- How many searches have you performed in the last year? List the types of clients and asset sizes involved.
- Provide three references similar to our organization.
- Outline the elements of your typical search process and a timeline.
- What do you feel are your firm's strengths and limitations?

	NOTES
•	

Overview of a typical

OCIO SEARCH **PROCESS**

PHASE 1: PREPARATION

2-4 WEEKS

- Identify selection team
- · Determine goals and requirements
- Establish search components, deliverables and timeline

PHASE 2: DUE DILIGENCE

6-8 WEEKS

- Create RFP and disseminate
- Collect and review completed

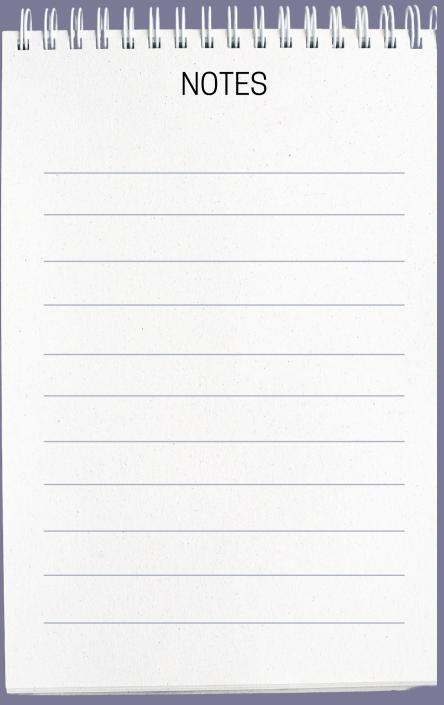

PHASE 3: SELECTION

4-6 WEEKS

- · Identify "finalists"
- Conduct finals interviews
- Select OCIO provider
- Document selection process

DRAFTING AN OCIO RFI/RFP

Request for Information

Request for Proposal

- Purpose: eliminate unsuitable candidates
- **Goal:** used to **identify** a first round of candidates or "semi-finalists" who will receive an RFP
- Optional: More common in selfdirected institutional searches in lieu of consultant database
- No. of Recipients: 10-15 potential candidates
- No. of Questions: 5-10 questions directed at organization's "must have" characteristics and services

- Purpose: illuminate promising candidates
- **Goal:** used to **compare** "semi-finalists" and select "finalists"
- Required: integral to both selfdirected and consultant-led searches
- No. of Recipients: 4-8 (selected from consultant database or through RFI)
- No. of Questions: 25-50 questions directed at all key characteristics and services

NOTES	

(10) KEY DECISION POINTS

PHILOSOPHY

Are there commonalities in the thinking of the candidate and the investment committee?

Does the candidate enhance the investment committee's views on investment policy?

ROLFS

What will be the candidate's roles and responsibilities in the relationship?

Is there flexibility on important areas?

IMPLEMENT-ATION

How will the candidate implement the organization's account (i.e., single fund, hybrid, customized separate account, combination)?

What will happen with legacy investments?

ENTERPRISE RISK

Does the candidate take an enterprise view of the organization and the investment portfolio?

Does the candidate's asset allocation proposal make sense?

Are the candidate's assumptions overly aggressive or conservative?

How does the candidate handle access to capacity-constrained managers?

Do all clients get pro rata access. or are some clients favored?

What other services does the candidate provide, and how will it become part of our team?

Which professionals will the investment committee work with, and will they commit to attend meetings?

Will the candidate specify the members of the team and their commitment in the contract?

> Does the board understand all the ways the candidate will get paid?

> > How deep is the team?

Does the candidate have a succession plan and a structure designed to ensure it will be able to provide services for at least 10 years? **ACCESS**

NOTES

AFTER THE TRANSITION: THE INVESTMENT COMMITTEE

in a typical OCIO partnership, the OCIO assumes responsibility for the day-to-day tasks involved in managing the organization's portfolio. Ideally, the investment committee will refocus its efforts on the remaining, higher-level duties, namely, to:

- establish and maintain a sound governance **structure** for the committee:
- periodically review the financial condition of the organization and confirm that the strategic (risk/reward) objectives for the investment portfolio are in alignment with and sufficient to support the organization's core mission; and
- monitor the performance of the OCIO.
